

Pizza Pal

Cheap pizza when and where you need it!

The problem

- There are various Pizzerias that charge different prices for the same pizza.
- It's inconvenient to browse many local pizzerias to find the best deal on your pizza order.

Solution Requirements

- Receive pizza order as input
 - User Address
 - Search radius
 - Size
 - Toppings
- Output the pizza order in the area with the lowest cost and a list of competitors
- Seamless user experience
- Attractive user interface

Solution
